

TEXT TO SPEECH SERVICE

TEAM ID : PNT2022TMID26050

PROJECT NAME: PERSONAL ASSISTANCE FOR SENIORS WHO ARE SELF
RELIANT

- To create the "Text to speech" service navigate to the catalogue and search for "Text to speech" and click on it.
- You will be navigated to another page where you can click on create to create the service

The screenshot shows the IBM Cloud console interface for creating a 'Text to Speech' service. The page is titled 'Text to Speech' and describes it as a service that 'Synthesizes natural-sounding speech from text.' The 'Create' tab is active, showing options to 'Select a location' (Sydney (au-syd)) and 'Select a pricing plan' (Lite). A table lists the 'Lite' plan with 10,000 characters per month for free. The right sidebar shows a 'Summary' of the service, including location, plan, and service name. A checkbox indicates agreement to the license agreement, and a 'Creating...' status is shown at the bottom.

Getting started with Text to Speech

Last Updated: 2021-09-22

The IBM Watson™ Text to Speech service converts written text to natural-sounding speech to provide speech-synthesis capabilities for applications. This `curl`-based tutorial can help you get started quickly with the service. The examples show you how to call the service's `POST` and `GET /v1/synthesize` methods to request an audio stream.

 **IBM Cloud® only.** Watch the following video for a visual summary of getting started with the Text to Speech service.

Get started with Watson Text to Speech
